

India's Exports of Technical Textiles Witnessed a Hike

TVC Editorial Team

India's Export of Technical Textiles

Technical textile is a rapidly expanding sub-segment used in a wide range of industries. The ultimate application of technical textiles is diverse and may be found in sectors including agriculture, sportswear, construction, healthcare, automobile and so on. A few of the important factors to the development of this market include India's push towards modernisation and its production efficiency.

Because of increasing market situation, tech-

nical textiles have witnessed a worldwide increase in recent times. Advanced technologies, a growth in end-use applications, cost-effectiveness, resilience, customer-friendliness, and sustainability of technical textiles have resulted in a rise in their market share in the global market.

In terms of revenue, Mobiltech, Indutech, Buildtech, Packtech, and Hometech account for almost two-thirds of the worldwide industry.

Technical textile makes around 13% of India's overall textile and garment industry and adds 0.7 per cent to India's GDP.
