- South Indian Textile & Apparel Cluster of Tirupur has accomplished well and have adopted the ZLD concept, the best in class for supply chain from fibre to garment with low C foot prints which are unseen and unique in the world.
- The textile & apparel industries of Tirupur are resourceful and very strong at integrating technologies. In addition, their strength lies in full compliance with global standards and brand needs.
- Considering that Tirupur textile cluster probably has its eco-processing systems in place with global standards in terms of ZLD, presence of wind mills and adopted sustainable processes, it is high time to capture the true deserving potential value in the Textile and Apparel sectors.
